Experience

ReactJs Frontend Developer　　　　　　　　　　　　　　　　　　Jan 2023 – Current

Artoon Solutions Pvt Ltd.　　　　　　　　　　　　　　　　　　　　*Surat, Gujarat*

- Demonstrated mastery in React.js, utilizing hooks, context API, and functional components to build dynamic and responsive user interfaces. Implemented best practices to enforce coding standards and ensure code quality.
- Integrated third-party libraries and APIs seamlessly into React applications, ensuring robust and efficient data handling.
- Utilized state management tools such as Redux and Context API to handle application state efficiently, improving application performance and user experience.
- Stayed up-to-date with the latest React.js trends and best practices, continuously improving development processes and application performance.

EDUCATION

Swarrnim Startup & Innovation University　　　　　　　　　　　　Surat, Gujarat

Bachelor of Computer Application

　　　　　　　　　　　　　　　　　　　　　　　　　　　　　　　Aug. 2022 – Current

PROJECTS

Diamond Connect / *react-js, redux-toolkit, simple-react-validator*

- **Baseball Scheduler**: Developed event scheduling and score management.
- **Signup Flow**: Designed and implemented a multi-page signup process.
- **Code Optimization**: Replaced class components with functional components.
- **Data Visualization**: Integrated charts, resolved bugs, and improved code quality.
- **Link** :- DIMOND-CONNECT

IMS / *react-js, rematch, antd*

- **Internal System Management**: Developed a project for allocating resources like PCs, mice, and inventory.
- **UI and Form Libraries**: Built the project from scratch, utilizing various libraries.
- **Resource Management**: Implemented tracking for inventory levels and resource allocation.
- **State Management**: Utilized Rematch for efficient state management.
- **Link** :- IMS

Ampliteach / *mui, full-calendar, react-hook-form, react-redux, redux*

- **Online Teaching Platform**: Developed a platform for musical instrument classes and courses.
- **Lesson Scheduler**: Used FullCalendar library to manage lesson schedules.
- **Role Management**: Implemented access control and user permissions.
- **Customizable Widget**: Created an embeddable widget and common signup form for easy integration into other projects.
- **Link** :- AMPLITEACH

Superworks / *react-js, zustand, tailwind*

- **Attendance Module**: Employees can view their attendance records and request modifications.
- **Visitor Module**: Stores data of external visitors to the company.
- **Plan Selection Module**: Currently working on this module, allowing companies to choose and pay for only the modules they need, optimizing costs.

Jainam / *next-js, zustand, tailwind*

- **Signup and Varification Module**: Handles user registration and verification processes.
- Analytics and event tracking with Mixpanel.
- Document verification through Hyperverge API.

TECHNICAL SKILLS

Languages: JavaScript, Typescript, HTML/CSS
Frameworks: ReactJS, Next.JS
Libraries: ANTD, MUI, React-Hook-Form, Simple-React-Validator, Zod, Rematch, Redux-Tookit, Zustand, *Socket.IO, React-Query*
Tools: Git, VSCode
